Request #13204 : The numbers in the workforce datasets don't add up

Gianfranco Cecconi   Saturday at 12:00

You write at the bottom of https://success.crowdflower.com/hc/en-us/articles/202703345-Crowd-Demographics (https://success.crowdflower.com/hc/en-us/articles/202703345-Crowd-Demographics) that the links describe the "datasets about our _full_ On-demand workforce and our Performance Level workforces".

The "Full On-demand Workforce" page shows a totality of >20k workers, but the sum of the no. of workers in each of the three contributor levels is about 8k. Where are the remaining 12k?

I need this information because I am adding some description of the worker demographics to an academic paper I am writing. Thanks.

Kirsten Gokay   Today at 00:29

Hi Gianfranco,

In addition to our leveled contributors, we also have unleveled contributors. These are contributors who have not worked in enough jobs to have gained levels - they must work their way up before they can do so.
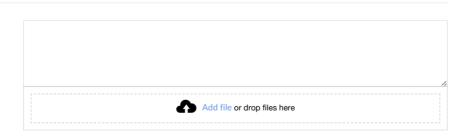

Regards,

Kirsten Gokay
